

Water and Sewer Related Emergencies

If you have broken water pipes that cannot be shut off at the entrance valve in the building, sewer backing up in the floor drains or toilets, call 406-863-2457 during working hours (8 a.m. to 5 p.m.) Monday—Friday, and 406-863-2420 after hours, weekends or holidays.

To find out if you have a leak, you may want to check

- **Your toilet** - It is not uncommon to lose thousands of gallons a day to a toilet leak. These are not always easily detectable. You can check for leaks by putting 10 drops of food coloring in the tank (*red or green are best*) and let it sit overnight without flushing. If the color shows up in the bowl, you have a leak that needs to be repaired.
- **Dishwasher and clothes washer** - Look for drips or stains underneath or behind these appliances.
- **Indoor and outdoor faucets** - Replace worn gaskets and washers.
- **Sprinkler systems** - Check for damaged sprinkler system heads and system leaks.

Tips on saving water at home

- Turn off the tap when not in use.
- Install water-efficient taps and showerheads to cut water usage.
- Take shorter showers and turn off the shower while lathering and washing your hair.
- Turn water off when you brush your teeth.
- Rinse dishes in a plugged sink rather than under running water.
- Use a pail of water to wash your car rather than a hose.
- Collect water from your roof to water your garden.
- Use your dishwasher and clothes washer for only full loads.

CITY OF WHITEFISH UTILITY DEPARTMENT

1005 Baker Ave • P.O. Box 158
Whitefish, MT 59937

New Customer Utility Brochure

The following information is provided to help you understand the City's water and sewer billing and payment procedures. Please read the information provided carefully and don't hesitate to ask our staff for assistance if you have any questions.

Customer Service Information

Starting Service

To set up a new utility account, an application form is available at the Utility Billing counter. Please know the service address, name of landlord (if applicable). A deposit in the amount of \$150.00, is required before providing service on any new account. A copy of a valid drivers licenses is required.

Automatic Payment Plan

The City of Whitefish offers an Automatic payment plan that will not only save you the cost of a stamp, but gives you the peace of mind that your monthly bill is paid on time. When you enroll in the plan you will receive your monthly bill as usual. Authorization forms are available at the Utility Billing counter. Complete the form and submit it with a voided check to the Utility Clerk. On the tenth of each month, the net amount of your bill will be automatically debited from your checking account.

Payment Methods

Payments may be made by mail, in person at City Hall (1005 Baker Ave.), in our drop box available outside the City Halls front door or by phone 406-863-2400. Customers can also make payments by credit/debit card (Visa, MasterCard) online at www.cityofwhitefish.org. On the main web page select **Pay Utility Bill Online**, you will need your Web Id which is located on your bill or you can call the Water Department for that information.

Returned Payments

Any payments that are returned for Non-Sufficient Funds (NSF) are charged a \$25.00 fee.

Garbage Pickup

The City of Whitefish has contracted with North Valley Refuse to provide billing and hauling service's for the entire City. Please contact them at 862-4381, regarding any questions about billing and pickup service.

Central Recycle Site

- **5 Columbia Ave** (Railway & Columbia Ave)

Utility Billing Schedule

- Utility bills are mailed at the end of every month.
- Utility bills are due and payable upon receipt. Any bills not paid by the 20th of each month, will be considered delinquent
- Utility bills become delinquent on the 21st day following the original bill date. At that time a late notice will be sent and a \$10.00 fee will be added to the account.
- In this late notice it will inform you of a date that a door tag will be hung and a \$15.00 fee applied, and the turn off date.
- If the account continues to remain delinquent, on the turn off date, a \$40.00 fee will be added to the account, weather or not the water is physically turned off.

Non-Delivery of Bill

Late or non-delivery of utility bills by the post office does not void the utility billing and payment polices. If the post office has not delivered your bill by the 5th of the month, contact the Utility Billing office

E-bills

You can now have your utility bill sent directly to an email. It's FREE and if you don't like it you can change it back at anytime. For more information contact the Utility Billing Clerk.

SUMMER WATERING

Residential customers who do not have a separate irrigation meter are allowed a monthly summer watering maximum of 12,000 gallons per month for water at a reduced rate, based on the average used during the seven monthly billing periods from November through May. Residential customers who have had their water and/or sewer turned off or have zero consumption during one or the seven monthly billing periods from November through May are not allowed an average for the summer months. Sewer charges are based on the average used during the seven monthly billing periods from November through May. For those who use a lot of outside water, such as for lawn sprinkling, it is possible to purchase a separate meter for sprinkling. This meter is purchased through the Utility Billing office, and the cost of purchase and installation by a licensed plumber is the property owner's responsibility.

Some facts about summertime sprinkling:

- Most lawns only need 1 inch of water each week, which can easily be achieved by sprinkling your lawn for about an hour once a week.
- Watering at night or early in the morning is best, as water evaporates quickly during the heat of the day.
- Less frequent watering actually encourages deeper, healthier lawn roots.
- Don't cut your grass too short. Grass retains more moisture if mowed to about 2.5 to 3 inches.
- Aerating your lawn by punching holes in it about 4 inches apart can allow for better water absorption and a healthier lawn.
- Raking compost over your lawn can also improve moisture retention and reduce the need for fertilizers.
- Reducing weeds in your lawn and garden can lessen the competition for water and fertilizer.
- Mulching your garden with organic matter improves nutrient content, water retention, reduces erosion and discourages weeds while reducing water evaporation in your garden.
